## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claim 20 is rejected under 35 U.S.C. 102(a) as being anticipated by Erickson et al., US Patent number 5,970,142.

With regard to claim 20, Erickson discloses a PLD (column 1 line 63), that receives an encrypted configuration bit stream (column 1 line 66-column 2 line 1), including a key (column 1 lines 63), a decryptor that decrypts a part of the bit stream using the key (column 2 lines 1-3), and configures elements with the configuration data from the bit stream (column2 lines 4-5).

With regard to claim 21, encrypted data inherently has indication of what key was used to encrypt it, since it can be decrypted with that key.

### ***Allowable Subject Matter***

1. Claims 1-19 and 22-29 are allowed.

### ***Response to Arguments***

2. Applicant's arguments concerning claims 20 and 21, filed 6/14/2004, have been fully considered but they are not persuasive.

Applicant argues that the key in Erickson is generated at each power-up, and that Erickson discloses non-volatile memory options for the PLD. The non-volatile memory options mentioned by applicant are options for the storage device, and not the PLD. As far as the PLD having volatile memory, the examiner points to column 4 lines 24-31, where Erickson mentions that the software tools can encrypt the configuration information prior to storing it in the storage device, where it is later further encrypted. Then the PLD decrypts it twice. The PLD must have the decryption key half of the software tool's encryption key in non-volatile storage to fully decrypt the data as described.

### ***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
